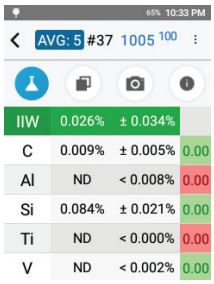
# SciAps Z-902 Carbon Analyzer
# Specifications

The world's first handheld analyzer to deliver carbon content just got better. SciAps Z-902 Carbon is the key to rock-solid, in-field analysis for alloys. Confirm alloy type and grade 300 series stainless into L, H, and S series. Determine carbon equivalents for welding. Perform material verification pre- and post-fabrication.

## In-use globally



- **Third-party inspection companies**
- **Pipeline inspection companies**
- **Chemical plants**
- **Refineries**
- **Manufacturing**
- **Shipbuilders**
- **Steel makers**
- **Scrap processing**

## A new standard for NDT/PMI

Identification of stainless steels and low alloy steels, including carbon analysis down to 70 ppm and instant CE (carbon equivalence) calculations using our uniquely powerful laser, onboard argon purge and high-resolution spectrometer.

- **On-board argon** delivers results for pennies per test.
- **Powerful laser** delivers 5-6 mJ/pulse on the sample, with a 50 Hz repetition rate. High energy and high repetition rate mean a clean burn.
- **Laser raster** can rapid-sample multiple locations in one test for fuller data.
- **Analysis averaging** available for multi-shot averaging and data rejection.
- **Sample alignment** micro-camera and LED Spotlight focus just where you want.

**190 nm – 420 nm spectrometer**
Includes a dedicated spectrometer for superior resolution in the 190 – 230 nm range

## True portability

Only 4.35 lbs (1.97 kg) with battery and a narrow profile for accessing the tightest spaces; an aerospace-grade aluminum body for improved performance in high ambient temperatures; and a re-designed, Android-based user-interface all make this system the most usable platform on the market. Wifi and Bluetooth with GPS capability to print, email, and connect to virtually any information management system for efficient, real-time test data and reporting.
